PERSONAL PROFILE

Motivated Computer Science student at Phoenicia University with hands-on experience in full-stack web development, backend engineering, mobile application development, database systems, and payment integrations. Experienced in building applications using React, TypeScript, Node.js, Express.js, Flutter, Dart, MySQL, and PostgreSQL. Strong foundation in REST APIs, authentication, database design, client-server architecture, and Git-based development. Proven communication, leadership, teamwork, and problem-solving skills through professional experience, technical projects, and university leadership roles.

EDUCATION

Phoenicia University (PU) - Sarafand, Lebanon

September 2023 - Present

Bachelor of Science in Computer Science

Key courses: Data Structures and Algorithms, Mobile Development, Database Systems, Web Development

Expected Graduation Date: August 2027

Bilal Fahs High School – Lebanon

Awarded in June 2023

Lebanese Baccalaureate in Life Sciences

PROFESSIONAL EXPERIENCE

Simigo AI – Protel | Development Department — Beirut, Lebanon

August 2026 – October 2026

Software Development Intern

- Contribute to the development of full-stack web and mobile applications using React, TypeScript, Node.js, Express.js, Flutter, and Dart.
- Developed and enhanced user interfaces, backend services, REST APIs, and database-driven functionality for production-oriented applications.
- Worked on the Simigo payment platform, integrating Blue Merchant and card payment workflows using CyberSource, supporting Visa, Mastercard, American Express, and Discover.
- Implemented and tested payment flows, authentication, API communication, error handling, and secure client-server interactions.
- Developed Flutter mobile interfaces for dashboard analytics, transactions, card details, and payment methods, integrated with a custom backend.
- Collaborated with the development team using Git/GitHub, Postman, MySQL, and VS Code for version control, API testing, database management, and application development.

Event Manager

- Manage and oversee event planning and execution for multiple large-scale projects
- Coordinate with creative teams and clients to ensure smooth operations and memorable experiences
- Lead communication, logistics, and on-site management for over 20 successful events

Future Stars Camp**July 2023 – July 2024****Lecturer**

- Conduct workshops on public speaking, communication skills, and active learning
- Mentored 300+ school students to improve confidence, teamwork, and leadership

AWARDS AND CERTIFICATIONS

- | | |
|---|-----------------------|
| • Cisco Networking Academy – Python Essentials 1 | August 2025 |
| • Cisco Networking Academy – Python Essentials 2 | August 2025 |
| • Cisco Networking Academy – Get Connected Course | September 2024 |
| • Cisco Networking Academy – Ethical Hacker | July 2023 |
| • Cisco Networking Academy – Introduction to Cyber Security | June 2023 |

EXTRACURRICULAR ACTIVITIES/ACHIEVEMENTS

Google Developer Groups (GDG) on Campus – Phoenicia University**Strategic Consultant****August 2025 – Present**

- Oversee the development of on-campus events promoting Google technologies and innovation
- Collaborate with regional GDG teams to enhance student engagement and learning opportunities

Event Planner**September 2024 – July 2025**

- Organized 10+ technical workshops and developer talks featuring industry professionals
- Managed event logistics and student outreach to increase participation

Computer Science Society – Phoenicia University**September 2024 – July 2025****President**

- Lead the CS Society in organizing coding competitions, tech fairs, and professional development sessions
- Partner with university clubs to promote innovation and teamwork among students
- Assisted in planning academic and community activities for Computer Science students

Phoenicia University Outreach**April 2024 – Present****Speaker & Mentor**

- Conducted on-campus sessions for visiting high school students to introduce the Computer Science major
- Presented university programs, career paths, and skill requirements for success in technology fields

Phoenicia University Science & Technology Fair**May 2023 – May 2024****Volunteer**

- Assisted in organizing booths, coordinating logistics, and supporting participating teams and judges.

PROJECTS

ChefMate — Full-Stack Recipe & Meal Planning Platform*React • TypeScript • Node.js • Express.js • MySQL • REST APIs*

- Designed and developed a full-stack recipe platform featuring recipe discovery, ingredient-based matching, favorites, reviews, pantry management, meal planning, and shopping lists.
- Built RESTful backend services and relational database structures for users, recipes, ingredients, categories, reviews, favorites, and other application data.
- Implemented JWT-based authentication, authorization, protected routes, filtering, search, pagination, and user-specific functionality.
- Developed a responsive and interactive frontend using React, TypeScript, Tailwind CSS, and Framer Motion.
- Created the recipe content using my own personal recipes and original food photography, combining my passion for cooking with software development.

ChefMate Mobile — Flutter Recipe Application

Flutter • Dart • REST APIs • Mobile Development

- Developed a mobile version of ChefMate using Flutter and Dart with a responsive interface designed for Android devices.
- Integrated the application with backend REST APIs for recipe discovery, ingredient matching, authentication, favorites, pantry, shopping, and user functionality.
- Built reusable Flutter components and structured application services, models, screens, and navigation for maintainability and scalability.

Expense Tracker — Full-Stack Group Project

React • TypeScript • Node.js • Express.js • MySQL • JWT

- Collaborated on the development of a full-stack expense management application for tracking and analyzing personal financial transactions.
- Developed backend APIs using Node.js, Express.js, and TypeScript with MySQL for persistent relational data storage.
- Implemented JWT authentication, password hashing, transaction validation, category management, monthly filtering, and reporting functionality.
- Built reporting and visualization features to help users analyze expenses by category and time period.

Recipe Information System — Networking Project

Python • TCP/IP • Socket Programming • Client-Server Architecture

- Developed a TCP-based client-server recipe management application in Python using socket programming.
- Designed a custom application-layer protocol to manage communication between the client and server.
- Implemented LIST, GET, ADD, and QUIT commands for retrieving, adding, and managing recipe information.
- Applied TCP/IP networking, socket communication, request-response handling, and client-server architecture concepts.

Krispy Tender Restaurant Website

HTML • CSS • JavaScript

- Developed a responsive restaurant website featuring interactive menus, ordering functionality, filtering, and dynamic user interfaces.
- Designed and deployed the project through GitHub Pages.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, Dart, C/C++, SQL

Frontend Development: React.js, HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, Responsive Web Design, Framer Motion

Backend Development: Node.js, Express.js, REST API Development, Client-Server Architecture, Authentication & Authorization, JWT, bcrypt, API Integration

Mobile Development: Flutter, Dart, Android Development, REST API Integration

Database Technologies: MySQL, PostgreSQL, Relational Database Design, SQL Queries, Database Schema Design, Data Modeling, ER Diagrams

Development Tools: Git, GitHub, VS Code, Android Studio, Postman, MySQL Workbench, Prisma ORM, npm, Vite

Web & API Technologies: RESTful APIs, JSON, HTTP, CORS, Environment Configuration, Third-Party API Integration

Additional Technical Knowledge: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Development, Version Control

Languages: Arabic (Native), English (Fluent), French (Basic)
